

SECTION A

THE ENGINE

GENERAL DESCRIPTION.

The four-cylinder overhead valve engine is built in unit construction with a single-plate Borg and Beck dry clutch and four-speed gearbox.

It has a four-throw crankshaft carried in three renewable steel-backed shell bearings. Thrust is taken on the centre bearing. The big-ends are also fitted with renewable steel-backed shell bearings.

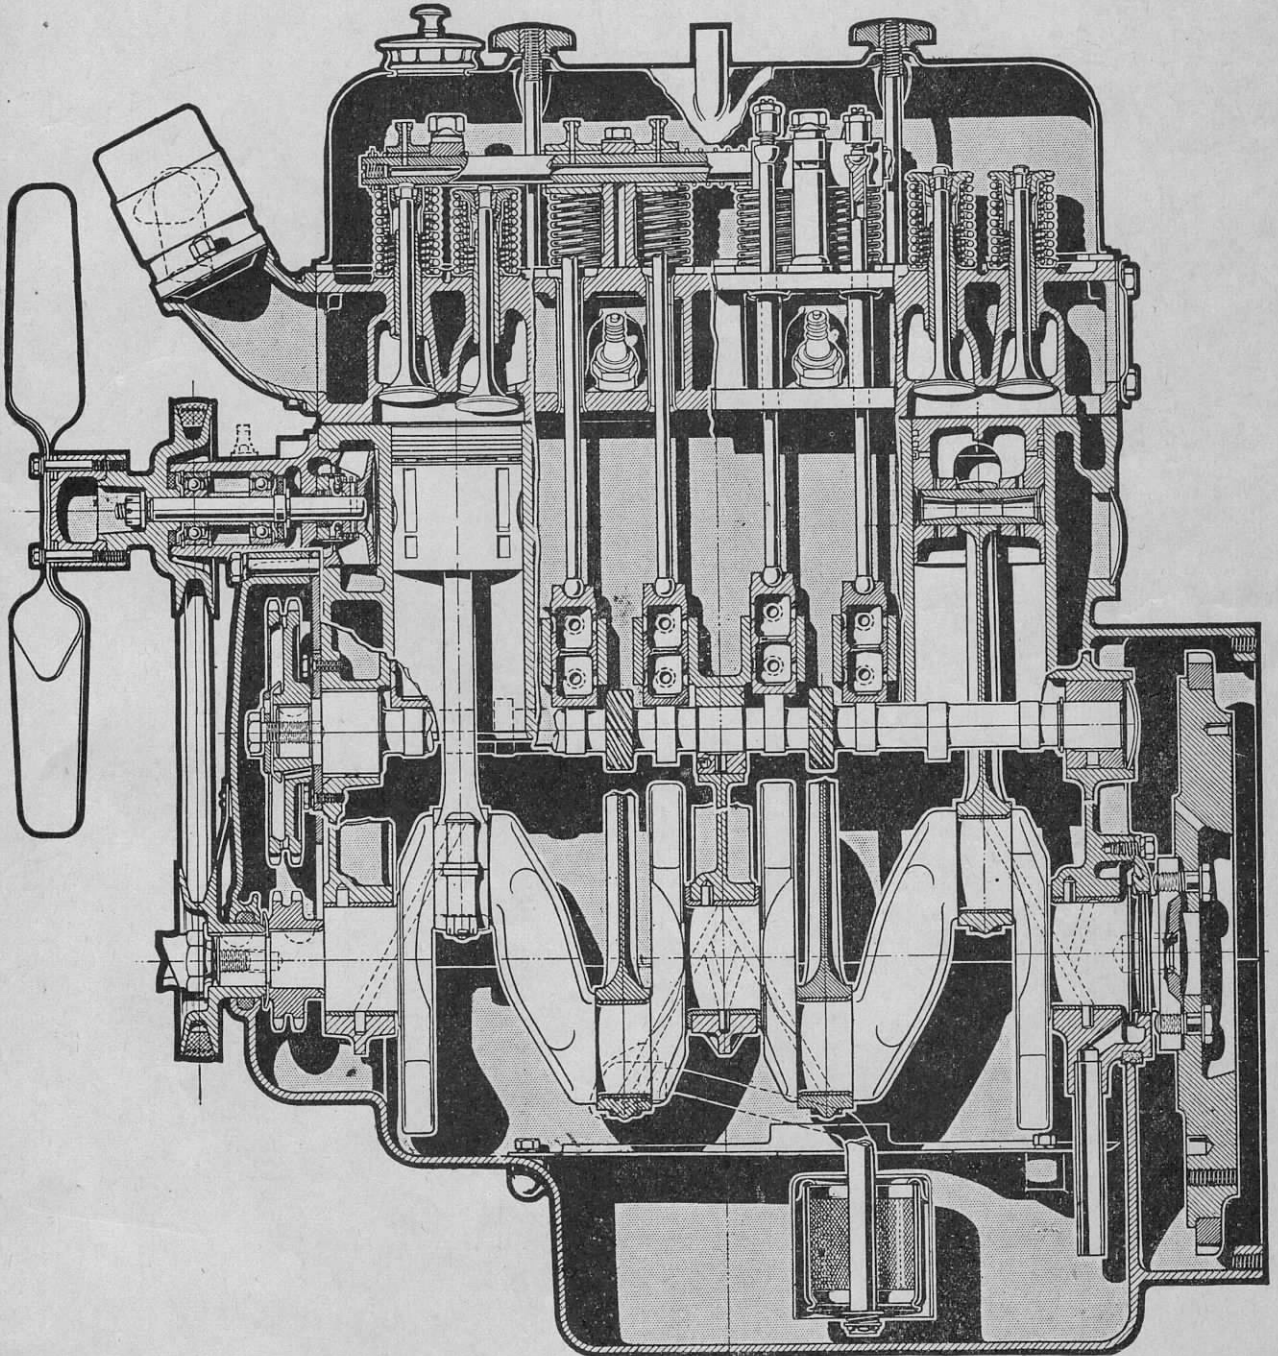

FIG. 1.—The M.G. Midget (Series "TD") engine.
